Ejercicio 1

Realice las siguientes multiplicaciones matriz-matriz:

Literal a)

```
import numpy as np

A = [
    [2, -3],
    [3, -1]
]

B = [
    [1, 5],
    [2, 0]
]

C = np.matmul(A, B)
print(C)
```

```
[[ -4  10]
 [  1  15]]
```

Literal b)

```
A = [  
    [2, -3],  
    [3, -1]  
]  
  
B = [  
    [1, 5, -4],  
    [-3, 2, 0]  
]  
  
C = np.matmul(A, B)  
print(C)
```

```
[[ 11   4  -8]  
 [  6  13 -12]]
```

Literal c)

```
A = [  
    [2, -3, 1],  
    [4, 3, 0],  
    [5, 2, -4]  
]  
  
B = [  
    [0, 1, -2],  
    [1, 0, -1],  
    [2, 3, -2]  
]  
  
C = np.matmul(A, B)  
print(C)
```

```
[[ -1   5  -3]  
 [  3   4 -11]  
 [-6  -7  -4]]
```
